

DEPARTMENT OF THE AIR FORCE 59TH MEDICAL WING (AETC) JOINT BASE SAN ANTONIO - LACKLAND TEXAS

16 MAR 2017

MEMORANDUM FOR SGVT

ATTN: CAPT PHILIPPINE DANA PERALTA

FROM: 59 MDW/SGVU

SUBJECT: Professional Presentation Approval

- Your paper, entitled <u>A Proposed Mechanism for Hypobaria-Induced Neuronal Injury:</u>
 <u>A Swine Model</u> presented at/published to <u>2017 AAN (American Academy of Neurology)</u>
 <u>Annual Meeting, Boston, MA, 22-28 April 2017</u> in accordance with MDWI 41-108, has been approved and assigned local file #<u>17142.</u>
- 2. Pertinent biographic information (name of author(s), title, etc.) has been entered into our computer file. Please advise us (by phone or mail) that your presentation was given. At that time, we will need the date (month, day and year) along with the location of your presentation. It is important to update this information so that we can provide quality support for you, your department, and the Medical Center commander. This information is used to document the scholarly activities of our professional staff and students, which is an essential component of Wilford Hall Ambulatory Surgical Center (WHASC) internship and residency programs.
- 3. Please know that if you are a Graduate Health Sciences Education student and your department has told you they cannot fund your publication, the 59th Clinical Research Division may pay for your basic journal publishing charges (to include costs for tables and black and white photos). We cannot pay for reprints. If you are a 59 MDW staff member, we can forward your request for funds to the designated Wing POC at the Chief Scientist's Office, Ms. Alice Houy, office phone: 210-292-8029; email address: alice.houy.civ@mail.mil.
- 4. Congratulations, and thank you for your efforts and time. Your contributions are vital to the medical mission. We look forward to assisting you in your future publication/presentation efforts.

LINDA STEEL-GOODWIN, Col, USAF, BSC Director, Clinical Investigations & Research Support

Linda Steel-Goodwin

PROCESSING OF PROFESSIONAL MEDICAL RESEARCH/TECHNICAL PUBLICATIONS/PRESENTATIONS

INSTRUCTIONS

USE ONLY THE MOST CURRENT 59 MDW FORM 3039 LOCATED ON AF E-PUBLISHING

- 1. The author must complete page two of this form:
 - a. In Section 2, add the funding source for your study [e.g., 59 MDW CRD Graduate Health Sciences Education (GHSE) (SG5 O&M); SG5 R&D;
 Tri-Service Nursing Research Program (TSNRP); Defense Medical Research & Development Program (DMRDP); NIH; Congressionally Directed
 Medical Research Program (CDMRP); Grants; etc.]
 - b. In Section 2, there may be funding available for journal costs, if your department is not paying for figures, tables or photographs for your publication. Please state "YES" or "NO" in Section 2 of the form, if you need publication funding support.
- 2. Print your name, rank/grade, sign and date the form in the author's signature block or use an electronic signature.
- 3. Attach a copy of the 59 MDW IRB or IACUC approval letter for the research related study. If this is a technical publication/presentation, state the type (e.g. case report, QA/QI study, program evaluation study, informational report/briefing, etc.) in the "Protocol Title" box.
- 4. Attach a copy of your abstract, paper, poster and other supporting documentation.
- 5. Save and forward, via email, the processing form and all supporting documentation to your unit commander, program director or immediate supervisor for review/approval.
- 6. On page 2, have either your unit commander, program director or immediate supervisor:
 - a. Print their name, rank/grade, title; sign and date the form in the approving authority's signature block or use an electronic signature.
- 7. Submit your completed form and all supporting documentation to the CRD for processing (59crdpubspres@us.af.mil). This should be accomplished no later than 30 days before final clearance is required to publish/present your materials. If you have any questions or concerns, please contact the 59 CRD/Publications and Presentations Section at 292-7141 for assistance.
- 8. The 59 CRD/Publications and Presentations Section will route the request form to clinical investigations, 502 ISG/JAC (Ethics Review) and Public Affairs (59 MDW/PA) for review and then forward you a final letter of approval or disapproval.
- Once your manuscript, poster or presentation has been approved for a one-time public release, you may proceed with your publication or presentation submission activities, as stated on this form. Note: For each new release of medical research or technical information as a publication/presentation, a new 59 MDW Form 3039 must be submitted for review and approval.
- 10. If your manuscript is accepted for scientific publication, please contact the 59 CRD/Publications and Presentations Section at 292-7141. This information is reported to the 59 MDW/CC. All medical research or technical information publications/presentations must be reported to the Defense Technical Information Center (DITC). See 59 MDWI 41-108, Presentation and Publication of Medical and Technical Papers, for additional information.
- 11. The Joint Ethics Regulation (JER) DoD 5500.07-R, Standards of Conduct, provides standards of ethical conduct for all DoD personnel and their interactions with other non-DoD entities, organizations, societies, conferences, etc. Part of the Form 3039 review and approval process includes a legal ethics review to address any potential conflicts related to DoD personnel participating in non-DoD sponsored conferences, professional meetings, publication/presentation disclosures to domestic and foreign audiences, DoD personnel accepting non-DoD contributions, awards, honoraria, gifts, etc. The specific circumstances for your presentation will determine whether a legal review is necessary. If you (as the author) or your supervisor check "NO" in block 17 of the Form 3039, your research or technical documents will not be forwarded to the 502 ISG/JAC legal office for an ethics review. To assist you in making this decision about whether to request a legal review, the following examples are provided as a guideline:

For presentations before professional societies and like organizations, the 59 MDW Public Affairs Office (PAO) will provide the needed review to ensure proper disclaimers are included and the subject matter of the presentation does not create any cause for DoD concern.

If the sponsor of a conference or meeting is a DoD entity, an ethics review of your presentation is not required, since the DoD entity is responsible to obtain all approvals for the event.

If the sponsor of a conference or meeting is a non-DoD commercial entity or an entity seeking to do business with the government, then your presentation should have an ethics review.

If your travel is being paid for (in whole or in part) by a non-Federal entity (someone other than the government), a legal ethics review is needed. These requests for legal review should come through the 59 MDW Gifts and Grants Office to 502 ISG/JAC.

If you are receiving an honorarium or payment for speaking, a legal ethics review is required.

If you (as the author) or your supervisor check "YES" in block 17 of the Form 3039, your research or technical documents will be forwarded simultaneously to the 502 ISG/JAC legal office and PAO for review to help reduce turn-around time. If you have any questions regarding legal reviews, please contact the legal office at (210) 671-5795/3365, DSN 473.

- NOTE: All abstracts, papers, posters, etc., should contain the following disclaimer statement:
 - "The views expressed are those of the [author(s)] [presenter(s)] and do not reflect the official views or policy of the Department of Defense or its Components"
- NOTE: All abstracts, papers, posters, etc., should contain the following disclaimer statement for research involving humans:
 - "The voluntary, fully informed consent of the subjects used in this research was obtained as required by 32 CFR 219 and DODI 3216.02_AFI 40-402."
- NOTE: All abstracts, papers, posters, etc., should contain the following disclaimer statement for research involving animals, as required by AFMAN
 - "The experiments reported herein were conducted according to the principles set forth in the National Institute of Health Publication No. 80-23, Guide for the Care and Use of Laboratory Animals and the Animal Welfare Act of 1966, as amended."

A PROPOSED MECHANISM FOR HYPOBARIA-INDUCED NEURONAL INJURY: A SWINE MODEL

P. Dana Peralta¹; John H. Sladky¹; Paul Sherman^{1,2}; Stephen A. McGuire^{1,2}

Neurology Department, San Antonio Military Medical Center, Fort Sam Houston, TX; 2U.S. Air Force School of Aerospace Medicine, Aeromedical Research Department, Wright-Patterson AFB, OH

BACKGROUND

multi-b-value diffusion (Q-space) and kurtosis anisotropy. mechanism for this is unknown. We hypothesized that if be demonstrable through diffusion magnetic resonance manifest as changes in unrestricted water diffusion and Non-hypoxic hypobaric exposure in Air Force U-2 pilots injury is due to diffuse axonal degradation, this would increased brain white matter hyperintensities (WMH) imaging (MRI), utilizing advanced techniques such as and hypobaric chamber personnel is associated with and decrements in neurocognitive processing. The We developed a swine model to test this theory.

	PROTOCOL OVERVIEW
Day 1:	Baseline MRI
Day 6-21:	Hypobaric Chamber Exposure Flights • Each subject 6 flights over 3 weeks (1 flight q3days)
	Subjects • Hypobaric Group (n=12) to 30,000 feet, 100% FiO2 • Control Group (n=12) to 5,000 feet, 21% FiO2
Day 22:	Post-flight MRI
Day 51:	Final 4-week post-flight MRI

METHODS

Subjects: 24 female miniature pigs (Sus scrofa domestica

All subjects imaged 3 times – at baseline, post-flight day hypobaria at 30,000 feet; 12 were controls exposed to standard cabin pressures of 5,000 feet on ambient air. Exposure: 12 repetitively exposed to non-hypoxic

group comparisons of perfusion diffusion index (PDI) and kurtosis, as well as an age-adjusted average fractional Analysis: 2-tailed t-tests were used for individual and 22, and day 51 anisotropy.

RESULTS

PDI Average FA

revealed an increase in unrestricted exposure showed normalization to repetitive high-altitude exposures. water diffusion immediately after PDI and mean kurtosis anisotropy Repeat imaging 4 weeks postpre-exposure values

exposure was significantly decreased in the high-altitude group when Age-adjusted mean fractional anisotropy (FA) at 4 weeks postcompared to controls (p < 0.001/0.547)

CONCLUSION

hypoxic hypobaric exposure incites axonal damage, as humans. This study provides evidence that repetitive hypobaric exposure incites axonal damage. Moreover, the control group. The significant decrease in FA at 4 injury occurred and replicates similar MRI findings in Our study demonstrates increase in unrestricted free more accurately reflect the heterogeneous reality of non-Gaussian diffusion. Our study is the first, to our knowledge, to provide evidence that repetitive nonit supports the utility of advanced diffusion imaging well as demonstrates our swine model as a feasible vector by which to study hypobaric neuronal injury and, possibly, other axonal injury processes like TBI techniques such as kurtosis anisotropy, which may exposure that is consistent with injury, not seen in weeks further supports that degradation of axonal water immediately after repetitive high-altitude
